## [Current Predictions – Bremerton Marina](#)

**Note:** Currents can be a challenge in Bremerton. The closest current prediction point to the Bremerton Marina is the South Entrance to Port Washington Narrows. The times of slack water at this point will closely approximate the time of slack water at the marina. The strongest currents in the marina always flow from SW to NE on both the flood and ebb.

*If currents in or near the marina are a concern, try to time your arrival or departure around the times of slack water at the South Entrance to Port Washington Narrows.*
