

SOUTH HANGAR DEVELOPMENT AREA

Bremerton National Airport is expanding its hangar space due to high demand. Twenty-one new, secure hangars will be built at the southwest corner of the airport, adjacent to the Runway 2 threshold. These hangars will be built in two phases:

- Phase 1: Three large corporate hangars (approximately 100' x 100')
- Phase 2: Seven medium-sized box hangars (50' x 50') and 11 T-hangars

The development will include vehicle parking and an environmentally-compatible aircraft wash rack. Additional information may be found at portofbremerton.org/airport.
